

	minimax ghost	random ghost
minimax pacman	won 5/5 avg: 497	won 5/5 avg: 514
expectimax pacman	won 2/5 avg: -98	won 4/5 avg: 541

3.

- 1) Both of them using minimax, but pacman can predict the action of ghost correctly.
- 2) Using expectimax, pacman maybe take the action worse than what ghost take.
- 3) Using minimax, pacman can take the action which contributes most to its victory.
- 4) Using expectimax is better than random move.

4. they do not share information with each other. However, the using minimax tree to reduce the score of pacman. It means that, they have the same goal to achieve. So it seems to be that, they corporate.
